

# PLASMON WP3: Events and Data Management

---

**A. M. Jorgensen**  
**Electrical Engineering Department**  
New Mexico Tech  
USA

# Outline

---

- Purpose of this discussion is to answer these questions (and any related questions posed):
  - Are there existing events with observations that can be used in the data assimilation?
  - What observations currently exist that can be used in the assimilation?
  - What do we need to do process/clean/transfer these data?
  - How do we organize a data pipeline to the assimilation?
- Considerations:
  - Active events are the easiest to work with
  - Long intervals of 10 days or more are preferred to allow the model time to stabilize

December 2006

---

# November 2006?

---

# Other events?

---

# Simulated Data?

---

# Summary
